

# State of Ohio Cyber Summit

February 17, 2010

The U.S. Department of Homeland Security's National Cyber Security Division and the National Cyber Security Alliance will provide a briefing of the progress and partnership with States and local communities in cyber security. The briefing will include current trends in cyber security and the relevance to the State of Ohio

## Session 1: Cyber Awareness for Elementary, Middle and High School Officials and University Representatives

Schools and the Internet are becoming increasingly intertwined. The Internet has opened our children to opportunities and risks.

Teaching Internet Safety and Cyber Security has a place in the classroom in the same way schools teach other life safety skills. Teaching our children to safely use computers helps protect them from cyber crime and out nation's Internet infrastructure from cyber criminals. Making school networks safe and secure protects your school, facility and staff as well.

**Cost: FREE**

### Participants:

- State of Ohio Public School Teachers, Staff and Administrators, ITC Directors
- University Officials
- National Cyber Security Alliance representatives
- US Department of Homeland Security

### Time:

9:30AM—11:00AM

### Location:

Columbus Division of Police Training Academy  
1000 N. Hague Avenue  
Columbus, OH 43204

**Seating available for 500**

People cannot value security without first understanding how much is at risk. Therefore, the Federal government should initiate a national public awareness and educational campaign... This campaign should focus on public messages to promote responsible use of the Internet and awareness of fraud, identity theft, cyber predators, and cyber ethics.  
- President's Cyberspace Policy Review

### State of Ohio Cyber Summit Sponsored by:

- US Department of Homeland Security
- Ohio Office of Information Technology
- Columbus Division of Police Terrorism Early Warning Group
- Ohio Homeland Security

This program envisioned for the State of Ohio will focus on opportunities and vulnerabilities and promote discussion on how officials can leverage technology to best serve the citizens of the Buckeye State

## Session 2: Cyber Security for Business and Local Government

Small business owners and local government officials have competing priorities— watching the bottom line, managing employees and serving customers/citizens. In all likelihood you are using technology and the Internet to increase communication, create efficiencies and expand your market.

- Do you fully understand the risks if you suffer a security lapse?
- Are your employees putting your business at risk?

- Could your brand be tarnished by cyber criminals if they hijacked your system?
- Can good Cyber Security give you a competitive advantage?

**Cost: FREE**

### Participants:

- Small/Medium Business & Local government Officials
- National Cyber Security Alliance representatives

- DHS Officials
- Local Chamber of Commerce
- IT Security Associations
